

Look who's talking about OSS/J

*"The OSS through Java™ Initiative's standardized functional APIs are **crucial for the long-term survival of all CSPs.**"*

— Sharon Ballard,
The Yankee Group

*"**OSS/J is creating** an environment of component-based solutions from multiple vendors. This is of **great value** to service providers worldwide."*

— Dave Milham,
British Telecommunications

*"The OSS through Java Initiative can have a **deep and far-reaching effect** on the industry."*

— Elisabeth Rainge,
IDC

"Integration costs can be reduced by adopting OSS/J standards and we intend to actively encourage OSS/J to pursue areas that will yield even more savings."

— Joerg Frankenberger,
Vodafone, Germany

"OSS/J APIs help service providers speed the deployment of systems supporting new services while controlling the high cost of integration. Leading carriers are backing OSS/J and we expect others to follow suit."

— Patrick Kelly, OSS Observer

"OSS/J interfaces prevent enormous numbers of errors and stop serious cost leakages."

— Wulf Bauerfeld, T-Systems

"Carriers are taking notice of OSS/J and Java has become the preferred platform for everything."

— BillingPlus Magazine (May 2004)

"OSS/J's approach to standardizing APIs will yield significant benefit to both the service provider community and the entire solution value chain."

— Scott Donahue, Stratecast Partners

"OSS/J is a proven implementation of NGOSS that can be used and repeated."

— Martin Creaner,
The TeleManagement Forum

"The OSS/J interface enables both open connectivity and rapid customization based on the precise customer environment, and is therefore an important enhancement of our solution."

— Luca Buscherini, Siemens ICN

"OSS/J technologies eliminate the integration and maintenance nightmares that so often plague service providers."

— Paul Grantham, Covad

"The growing interest in OSS/J is a welcome sight."

— Telephony Magazine (May 2004)
