

One Good Switch...

Fabric Switch

Deserves Another.

APCON Intelligent Crosspoint Switch

Fabric switches can't do everything. Like **create remotely controllable environments for interoperability and testing.** That's why APCON's Intelligent Crosspoint Switches are quickly becoming the industry standard for Fibre Channel, Avionics, Telecom and LAN testing, as well as network analysis.

"We could find no better way, and certainly no more cost-effective way, to do fail-over testing or problem reproduction."

- a senior engineer at a leading fabric switch company.
